Tuesday, October 11, 2022 @ 3:00
HVAC Progress Meeting at the Buchanan County Academy

Present: Scott Burnham, Terry Clark, Aidan Johnson, Randy Schultz, Rick Miller, Chris Herner, Dan Sharp, David Stroud and Kim Hartman.

Randy reported that Evergy has scheduled their install for Friday, 10/14/22. Service should be down about 30 minutes in each area; he will have a generator on site to run the building while Evergy is working.

Aidan reported that three of the five remaining units came in. They can hook up the main floor to get heat on in those areas. He has more guys coming on Wednesday. The last two units are due to ship on 10/17/22. He will check on the unit for the kitchen. There are still five different-type units on hold that are being shipped from Japan. Rick asked Aidan to get the ducts run for the girls dorm area and that the rest of the duct work needs to be finished.

So far temperatures in the building haven't been too bad. Dan reported that their top priorities in getting heat are 1) the top floor where the dorms are; 2) the first floor where the offices and classroom are; and 3) the basement.

The next meeting is scheduled for Monday, October 24, 2022 at 3:00 p.m. at the Academy.
